 - 21.1 Personal matters about an identifiable individual, including municipal or local board employees; 239(2)(b) –Staff Review, Deputy Clerk Position, By-law Enforcement
22. **CONFIRMING BY-LAW**
 - 22.1 By-law 2022-35 - Confirming the Proceedings of Council
23. **ADJOURNMENT**

McKellar Township Report to Council

Prepared for: Mayor and Council

Department: Public Works

Agenda Date: June 24, 2022

Report No: PW-2022-02

Subject: Inholmes Bridge

Recommendations: That the Council of the Township of McKellar does approve the replacement of the current Inholmes Bridge with a new bridge from Algonquin Bridge at an estimated cost of \$150,000.00.

That the Council of the Township of McKellar does immediately pass a by-law implementing a load restriction of 9 tonnes total weight on Inholmes Bridge.

Analysis/Discussion: On Monday June 13, 2022 the Inholmes Bridge was damaged by an ambulance travelling at a high rate of speed, removing a large section of the decking from the frame of the bridge. An interim repair has been done to allow for light vehicular traffic. Signage of load restriction of 5 tonne per axel has been posted. Bob Hughes of RHH Engineering conducted an inspection on June 17, 2022, and offered two solutions to address the current state of the bridge

Solution 1. Repair the bridge at an estimated cost of \$100,000.00, if further damage to support beams is not discovered. Repairs would include sandblasting, replacement of any beams that are deemed unsafe, painting, and re-decking the bridge. With all repairs completed the Inholmes Bridge will still carry a load restriction limit to be determined by an Engineer.

Solution 2. Replace the bridge with new from Algonquin Bridge, at an estimated cost of \$135,000.00 - \$145,000.00 plus \$15,000 to install. A new bridge would be wider than the current bridge and would not have a load restriction.

GHD Engineering Bridge Report of 2021 indicates a cost of repair to Inholmes Bridge at \$347,000.00.

Budget Implication: Payment for the bridge would be made as follows:

\$125,000.00 from the working fund reserve.

\$ 25,000.00 from the infrastructure assets reserve.

Any remaining balance will be paid from budget surplus. There is currently \$35,000.00 in the 2022 budget for Inholmes Bridge.

Discussions are being held with Adams Brothers Construction to remove the old bridge at no cost to the Township in exchange for the value of the scrap metal.

Council can give direction to staff to submit an insurance claim for the cost of repairs to or replacement of the bridge.

Policies Affecting Proposal: Procurement Policy – By-law No. 2019-44

Conclusion: It is the opinion of Senior Staff that replacement of Inholmes Bridge with a new bridge from Algonquin Bridge Limited is the best option for the Township. The new bridge will eliminate the need for repairs for up to 30 years. A new bridge will be safer for the public and will have no load restrictions.

Respectfully submitted by:

Greg Gostick
Director of Operations
